

## SKZ130 Reciprocating Friction Tester

Used for the determination of the abrasion resistance of the test piece. Friction hammer reciprocating movement, specimen clamping on the test bench by the weight increase generated frictional resistance, During the test by automatic counting counter and display, the number reached the set, automatic shutdown.

### **Technical parameters:**

1. Friction stroke: 70mm or 145mm
2. Friction speed: 60 times / min
3. counter counting range: 0 to 9999 or 0 to 99999999
4. Dimension: 700mm × 460mm × 500mm
5. Power: AC220V 50Hz
6. Weight: 50kg
