

SKZ142 Dumbbell Sample Cutter

Dumbbell-shaped sample cutter is used to make standard sample of the dumbbell-shaped, rectangular of plastic semi-rigid, rigid non-metallic material.

Put material directly into the corresponding fixture clamping milling molding, close to the rotation of the cutter, the chip is inhaled by the vacuum cleaner

Apply to standard of ISO527-Tensile Properties of Plastics test methods, specified in I, II type dumbbell-shaped specimen holder

Technical parameters:

- 1, Cutter speed: 2800r/min
2. Power: 220V \pm 10% 50Hz 500W
3. Dimension: 400mm \times 400mm \times 350mm
- 4, Weight: 30kg
